optional:		Hat	
Skin lotion			
Contact lense fluid and case			
Sunscreen			

The weather in Julian is scheduled to be a high of 76 degrees in the daytime with a nightime low of about 44 degrees. Therefore all students are expected to bring warm layers to protect theselves at night while we stargaze and for the inevitible chilly Friday morning. Although not absolutely necessary, thermal underwear (long johns) provide excellent thermal insulation for just such occasions!
